December 12, 2011

### **To Our Neighbors in Princeton Township**

As part of our company's effort provide high quality drinking water and improve service to our customers, New Jersey American Water will be replacing 1,740' of 6" cast iron water main with new 8" Ductile Iron water main along sections of Grover Avenue between Terhune Road and Clearview Avenue in the Township Of Princeton. This new water main is being installed to improve service reliability, water quality, and increase fire flows to the area.

Starting on or about December 19, 2011 and continuing for six weeks, Vollers Excavating Inc. a contractor working for New Jersey American Water will be performing the work. Construction is scheduled to take place between the hours of 7:00 AM to 4:00 PM Monday thru Friday. Traffic control will be coordinated through the Princeton Township Police Department. Local road closures during construction may be in effect. All roads will be open at the end of the work day with emergency access provided at all times. As part of this upgrade all water meters will be relocated from inside your home or business to a meter pit that is located in the right of way area along the street or curb line.

You may experience brief periods of service interruption while the work is being performed. All customers will be given prior notice to any service disruption. New Jersey American Water will do everything possible to ensure a minimum of inconvenience while the new water main is being installed.

If you have any questions regarding this matter please contact Mr. Mike Mcfarland Construction Inspector at (908) 482-5283.

Sincerely,  
New Jersey American Water
